

CAPABILITY STATEMENT

The Markosky Engineering Group, Inc. provides environmental consulting, environmental compliance, NEPA documentation, archaeology and architectural history services that streamline and expedite the environmental permitting process for federal, government, and private clients.

CORE COMPETENCIES & SERVICES

Markosky maintains archeological equipment to complete any Phase I, II, or III surveys, laboratories to process and house artifacts. By offering both environmental and engineering services our team can complete multiple assignments for projects with short completion schedules.

CORE COMPETENCIES

- Section 4(f)
- Section 106 and 404
- FHWA Delegated CRP's
- Threatened & Endangered Species
- Asbestos & Lead Paint

CORE SERVICES

- Archeological Investigations
- Historic Structures Evaluations
- Environmental Justice
- Environmental Planning, Permitting, Design
- Hazardous Toxic Radiation Waste Investigations
- Geomorphological Surveys
- NEPA Clearance

DIFFERENTIATORS

- Produce clear and concise documentation that streamlines agency reviews and expedites environmental approvals.
- Write special provisions and reports that have been used by agencies as examples for other consultants to follow.
- Create innovative designs to reduce project impacts and significantly advance delivery schedules.
- Three FHWA-delegated Cultural Resource Professionals on staff responsible for Section 106 compliance.
