Jason has been with The Markosky Engineering Group, Inc. for 8 years. He has 25 years of experience in the environmental field focusing on natural resource investigations for state and private clients. Jason's experience ranges from environmental planning during the pre-NEPA phases of projects, project scoping and NEPA document development, and waterway permit preparation. He has extensive experience in aquatic resource investigations, botanical surveys, mitigation site selection and post-construction monitoring (wetland, stream, terrestrial habitats), and agency coordination. In his new role, Jason will be responsible for providing environmental QA/QC and coordination for this Agreement. He will use his experience and knowledge to guide the environmental division staff to answer questions and provide assistance. This enables Markosky to provide high quality submissions for which we are known to consistently deliver.
